

Just say hello!

My Friend

abstract: This is a pandoc test with Markdown + inline LaTeX from <https://tex.stackexchange.com/questions/139139/adding-headers-and-footers-using-pandoc>—

L: Left field E: Even page C: Center field O: Odd page R: Right field

H: Header F: Footer

comment invisible after this :

test with double call of : `pandoc -i repgen__headfooter__graph_0.md -o repgen__.pdf |open -a Preview repgen__.pdf`

its possible to make a markdown template for pandoc or a latex template

This is left

latex's pagebreak will start a new page and the paragraphs of the old page will be spread out so that the old page will not look like the end of a chapter.

second page

This is left

usepackage(book tabs) <https://www.latex-kurs.de/kurse/2017/Kurs1/Teil9/Tabellen/Druck-Tabellen.pdf>

Studium		
Fach	Dauer	Einkommen (\$)
Info	2	12.75
MST	6	8.20
VWL	14	10.00

next is same as use package(tabular}

1	2	3
4	5	6
7	8	9

third page with ?worse pagebreak instead of newpage
